

EasyInspect

Easy & Ready-to-operate
Web Inspection System

Easy way to detect defects!

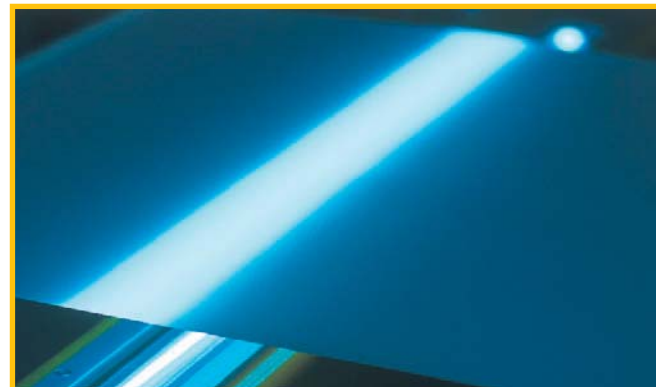

EasyInspect

EasyInspect is a new 100% high speed and high performing web inspection system

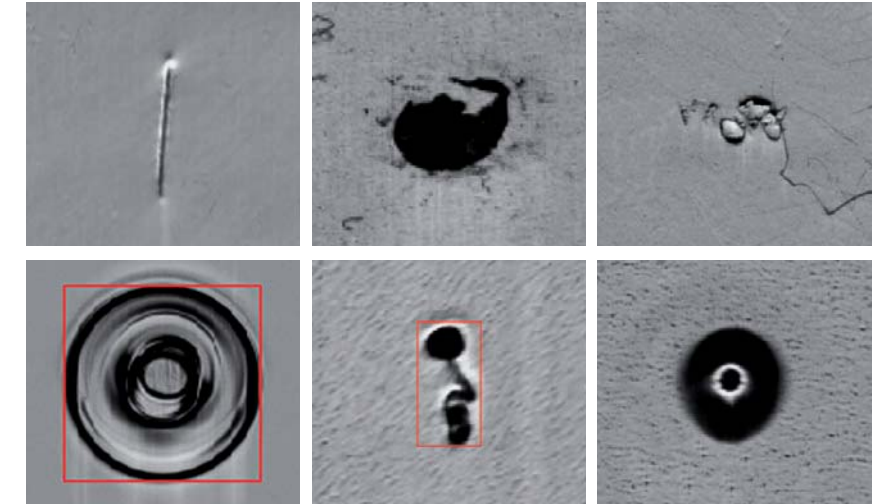

EasyInspect Provides

- High-speed camera technology
- State-of-the-art lighting systems
- Defect mapping
- Defect density analysis
- Simple and easy to configure reports
- Defect classification
- Statistical data analysis
- Detailed defect imaging

Detection of

- Contaminants
- Gels
- Inclusions
- Holes
- Scratches
- Streaks
- Bubbles
- Coating Voids
- Stains
- Dirt
- Wrinkles
- Tears
- And many more...

EasyInspect Software Features

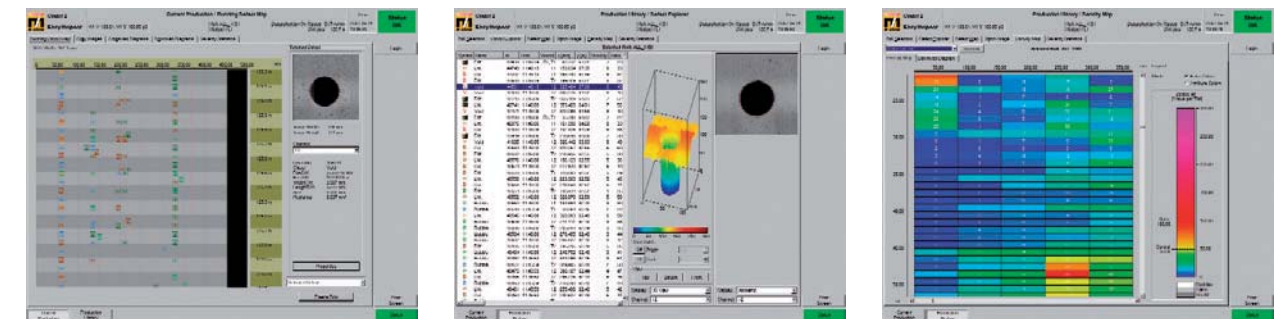

- Defect images
- Real-time defect map
- Real-time statistical defect analysis
- Roll history
- Easy data access and export

Materials Inspected

- Films
- Nonwovens
- Paper
- Foils
- Coated Products

EasyInspect – Benefits

- Fast delivery and integration
- Easy setup and operation
- Low operating costs
- Rapid root-cause analysis
- Process optimization and yield enhancement
- Improved product quality
- Saves labor costs
- Higher customer confidence and satisfaction

Dr. Schenk's modern production site

Dr. Schenk GmbH, established in 1985, is an innovative high-tech company with its headquarters in Munich, Germany and production facilities in Germany and the USA.

For more than 20 years, the range of products and services offered by Dr. Schenk includes comprehensive solutions for automated quality assurance and production process monitoring – areas where we continue to set new standards for the inspection of surfaces and the measurement of optical and mechanical properties, through the continuous utilization of the latest technical advances in optics and electronics.

The focus of all our activities is the perfect synergy between practical ideas and innovative solutions. This vision is supported by the three cornerstones of our rigorous quality standards: technical excellence, outstanding applications and long term customer support and assistance.
